Step 1: Run "Snapshot" function in the transmitter (downloads critical diagnostic data to the SONARstick™)

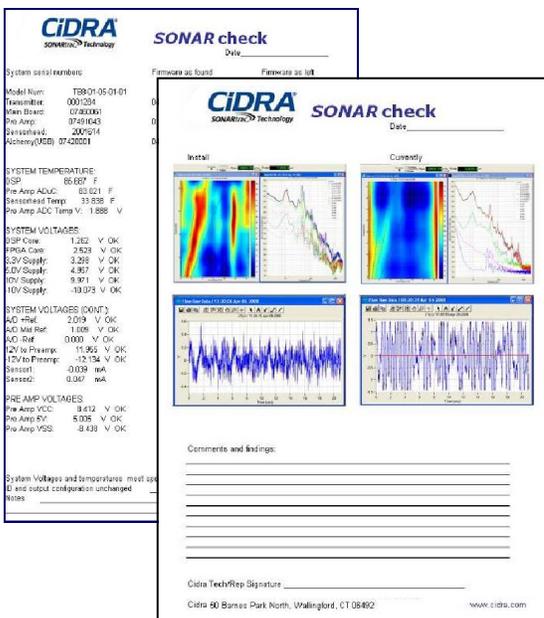

Step 2: Send electronic data to a secure area of the CiDRA web

Step 3: CiDRA technicians analyze the data and issue a verification report

- Transmitter configuration compared to initial installation
- Transmitter optimization is evaluated
- Sensor/pipe contact is trended
- Sensor health is evaluated
- System voltages checked against allowed tolerances
- On board health check status is reviewed
- All data is analyzed for any predictive maintenance recommendations
- Final report is issued
