

BREAKthrough
technology

for
Water/Wastewater Flows
**Non-Contact
SONARtrac Flow Meter**

**If your conventional in-line meters have failed, consider a
SONARtrac flow meter . . . why?**

The SONARtrac System is the lowest cost of ownership:

- Safe, simple clamp-on installation
- No re-calibration
- No maintenance, non-ultrasonic
- No crane or hoist required for installation
- No rework of pipe necessary
- No bypass line or isolation valve for service
- +/- 1% accuracy, with no drift
- Works with solids in liquid stream
- Proven technology for a variety of pipes; lined and unlined

BREAKthrough
technology

for
Desalination Flows
Non-Contact SONARtrac
Flow Meter

If your current flow meter is challenged by corrosion and deposits inside pipewalls, consider a **SONARtrac flow meter . . . why?**

The SONARtrac System is the lowest cost of ownership:

- Not affected by scale buildup or liners
- Not affected by biofouling
- Not affected by corrosion
- No contact with the fluid
- Does not wear out
- Maintenance-free
- No flanges required
- Works well on most pipe materials, including fiberglass
